EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Bruce Hayden on September 09, 2004.

The application has been amended as follows:

In the specification line 2, replace "09/256,847" with --09/265,847--.

In Claim 15, last line after "group" insert -- ; and a controller/sequencer adapted to selectively apply DC power to said electromagnets of said first plurality of electromagnets and said second plurality of electromagnets to induce a rotation of said flywheel selectively at variable torques and speeds in at least a first direction of rotation entirely through repulsion of the first permanent magnet group by the first plurality of electromagnets--.

In Claim 16, last line "group" insert -- ; and a controller/sequencer adapted to selectively apply DC power to said electromagnets of said first electromagnet means and said second electromagnet means to induce a rotation of said flywheel selectively at variable torques and speeds in at least a first direction of rotation entirely through repulsion of the first group of permanent magnets by the first electromagnet means--.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the prior art does not teach a propulsion motor having a flywheel with two concentric magnet arrays having first and second uniform polarity, circular arrays on one of the faces of the flywheel, with two groups of electromagnets to selectively interact with the concentric arrays of magnets, and a controller/sequencer adapted to selectively apply DC power to said electromagnets of the first and second electromagnet groups to induce a rotation of the flywheel at selectively variable torques and speeds entirely through repulsion of the first group of permanent magnets by the first electromagnets.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karl I.E. Tamai whose telephone number is (571) 272 - 2036.

The examiner can be normally contacted on Monday through Friday from 8:00 am to 4:00 pm. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Darren Schuberg, can be reached at (571) 272 - 2044. The facsimile number for the Group is (703) 872 - 9306.
